Abstract

This paper tests reliable scientific document extraction.

We compare two-column reading order and faithful figure grounding.

1 Introduction

LEFT_ONE begins the first column.

LEFT_TWO continues the same argument.

LEFT_THREE finishes before the right column.

RIGHT_ONE begins after the left column.

RIGHT_TWO must never interrupt LEFT_TWO.

RIGHT_THREE ends this reading-order test.

1 Important footnote: preserve this scientific qualification.

2 Results

Figure 1 presents a reproducible increasing trend.

The original vector chart is evidence, not a decorative image.

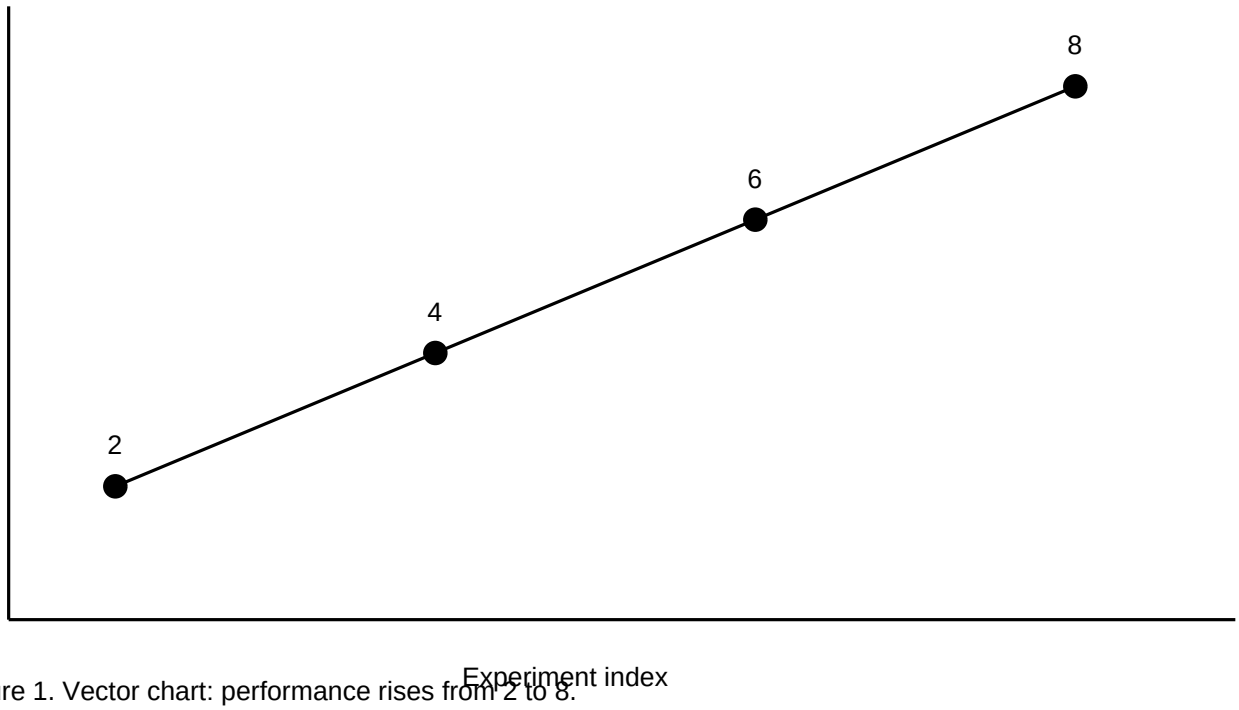

Figure 1. Vector chart: performance rises from 2 to 8.

The cross-column caption belongs to the entire chart.

This statement follows the figure in the reading order.

3 Image Evidence

Figure 2 shows the same self-authored chart as a bitmap.

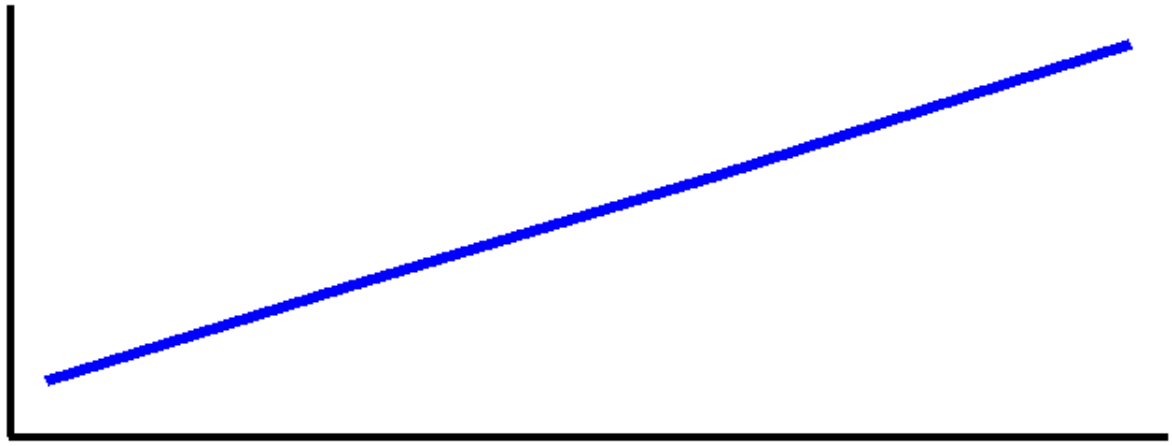

Figure 2. Bitmap chart with a rising blue line.
