Structured Experimental Results

1 Experimental Results

Table 1 compares the measured accuracy and F1 of two methods.

Table 1. Evaluation on the fixed benchmark.

Method	Evaluation Metrics	
	Accuracy	F1
Baseline	0.731	0.704
Proposed	0.812	0.793

The values are fractions. Higher accuracy and F1 indicate better performance.

$$E = m c^2$$
